SKILLS

Game Dev

- Unity
- C#
- Shader
- UI Toolkit (USS/CSS)
- Unreal Engine
- C++
- Photoshop
- Illustrator

Game AI & Procedural Generation

- Pathfinding
- State Machines
- Behaviour Trees
- GOAP
- Wave Function Collapse

Tools & Web

- Git
- LLM-Workflows
- MCP
- Python
- SQLite
- HTML/CSS
- JavaScript

LANGUAGES

- German — Native
- English — Proficient (C2)

CERTIFICATIONS

- Relaxation therapy
- Sitting school certificate
- Kinesio taping
- Windsurf instructor license

HOBBIES

- Computer games
- Riftbound TCG
- Darts
- SUP (stand-up paddling)

PROFILE

Sport is taken for granted as something valuable, while gaming is still often reduced to its downsides. Yet both run on the same principles: practice, feedback, motivation and learning by doing. Coming from sports science, I have spent three years building digital games that use and amplify that potential. No other medium can make complex relationships and dry material this tangible, so that they are understood more easily and stay understood. Combined with a motivating play experience, that is what I consider an ideal learning environment. My focus areas are complex systems, data analysis, engine tools, workflow optimisation and game-specific AI. For the past few months I have been deliberately training my programming skills in combination with AI models, backed by a harness of my own that I have built and steadily refined over many months. The AI remains a multiplier of my own abilities, but it gives me the chance to think about software architecture at a higher level.

EDUCATION

- 2024-04/2026

Games Programming (Diploma)
SAE Institute Hamburg
- 2023-2024

Game Design
Deutsche POP
- 2013-2019

Sports Science (no degree)
Ruhr-Universität Bochum
- 2008-2010

International Baccalaureate
Ellesmere College, Ellesmere (England)

PROJECTS

All portfolio projects in detail at www.thinkshark.de

Izzy's Island Party

Local party game with 6 mini-games for 1-4 players (SAE final project, two-person team, built without AI assistance). Built 3 of the mini-games on my own.
Unity 6 · C# · GOAP · github.com/DJTJ9/IzzysIslandParty

BullseyeQ

Darts training app with progress tracking, practice games and deterministic data analysis that derives concrete training recommendations.
Unity · C# · github.com/DJTJ9/BullseyeQ

Bob der Job-Bot

Bob collects listings into a shared pool, scores them per profile and, through AI-generated neighbouring roles and skill overlap, also suggests jobs you would never have searched for. Live with real fellow users, source code public.
Python · FastAPI · SQLite · MCP · job-scanner.thinkshark.de

Project Setup Tool

Unity editor tool for starting a project: creates the folder structure, installs standard packages at the push of a button and imports script templates for reusable systems.
Unity · C# · Editor-Scripting

PREVIOUS EMPLOYMENT

- 2021-2023

Service Associate · Tankstelle Riekenberg, Rotenburg
- 2020-2021

Care Assistant · Rotenburger Werke, Rotenburg
- 2014-2019

Student Assistant · Der Werbemarkt
- 10/2010-03/2011

Basic military service
